Oil Plus 2C obtains GreenGuard Gold certificate

Dear customer,

Our Oil Plus 2C has recently obtained the **GreenGuard Gold certificate** thanks to our slightly **improved formula**. This label shows that our product is **safe for the environment and human health**. All packagings of Oil Plus 2C already contain the GreenGuard Gold formula.

About the GreenGuard Gold label

Products that have achieved GreenGuard Certification are scientifically proven to meet some of the world's most rigorous, third-party chemical emissions standards. This helps to **reduce indoor air pollution and the risk of chemical exposure**, while aiding in the creation of **healthier indoor environments**.

We are very proud that we have obtained the Gold version of this GreenGuard label. This highest possible GreenGuard **certification confirms our EcoConscious story** once again. Since the certificate focuses on VOCs, this is yet another

confirmation that we are **VOC free**. Thanks to this, our products don't cause headaches, eye, nose and throat irritation, dizziness or even chronic diseases or cancer. Instead, Oil Plus 2C can **safely** be used **for indoor environments**. As Oil Plus 2C has obtained the GreenGuard **Gold**, this means that the product is also **safe for schools and healthcare facilities**.

This certificate is also beneficial and important for markets outside the USA. GreenGuard Certification Standards are among the most rigorous in the world, so you can be confident that these certified products live up to their claims. Obtaining this certificate goes to show that we really have a **top quality product** here.

Other advantages of the GreenGuard Gold formula

The improved formula facilitates a **lower consumption**, **higher floor slip resistance** and **better storage stability with high temperatures**. Moreover, it is **perfectly possible to mix both formulas** with each other, so old and new batches can be used together for projects.

Please note: as a result of the improved formula, the colour "**Pure**" looks **different in the can or bottle**. The different look is only visible in the packaging, **once applied there is no colour difference** compared to our previous version.
