

Sauna and Spa

Sokos Hotel Koljonvirta, Iisalmi, Finland
Architect: Visionary Design Partners
Products: Luna Trio (walls and ceiling), Luna Dual (backrest), Luna SHP 26x92 & 19x140 (decks)

Crafted in Finland without chemicals, Lunawood ThermoWood® brings a touch of Nordic nature into saunas, spas, and bathrooms. Its beautiful appearance, resin-free composition, and dimensional stability are perfectly complemented by its hygienic and calming properties—creating a truly soothing and relaxing experience.

Dimensionally Stable and Durable
Lunawood ThermoWood® maintains its dimensional stability and shape even in the most demanding conditions.

Used in sauna wall paneling, ceilings, and benches, Lunawood offers long-lasting resistance to high temperatures and humidity—making it a perfect choice for years to come.

Resin-Free and Pleasant to the Touch
A truly natural material without chemicals, Lunawood does not release harmful indoor emissions or resin—even at high temperatures.

Thanks to its low thermal conductivity, Lunawood enhances comfort in the sauna—the surface stays pleasantly warm and won't burn, even in high heat. Safe to sit on and lean against.

A Sustainable and Timeless Material
Sourced from sustainably managed Finnish forests and entirely free from chemicals, Lunawood ThermoWood is the eco-conscious choice for saunas.

Its golden-brown, warm tone and natural wood texture bring elegance and a welcoming atmosphere to any sauna.

Most popular Lunawood products for saunas and spa areas.
